Module 4: Procedure Codes

Module Contents:

- CHIEF v CDS Procedure Codes Type of
- Movement Declaration Categories and
- Procedure Codes Requested and Previous
- Procedure Finding the Procedure Code
- Additional Procedure Codes DE 1/10 and DE
- 1/11 Correlation Matrix Choosing the
- Additional Procedure Codes
-

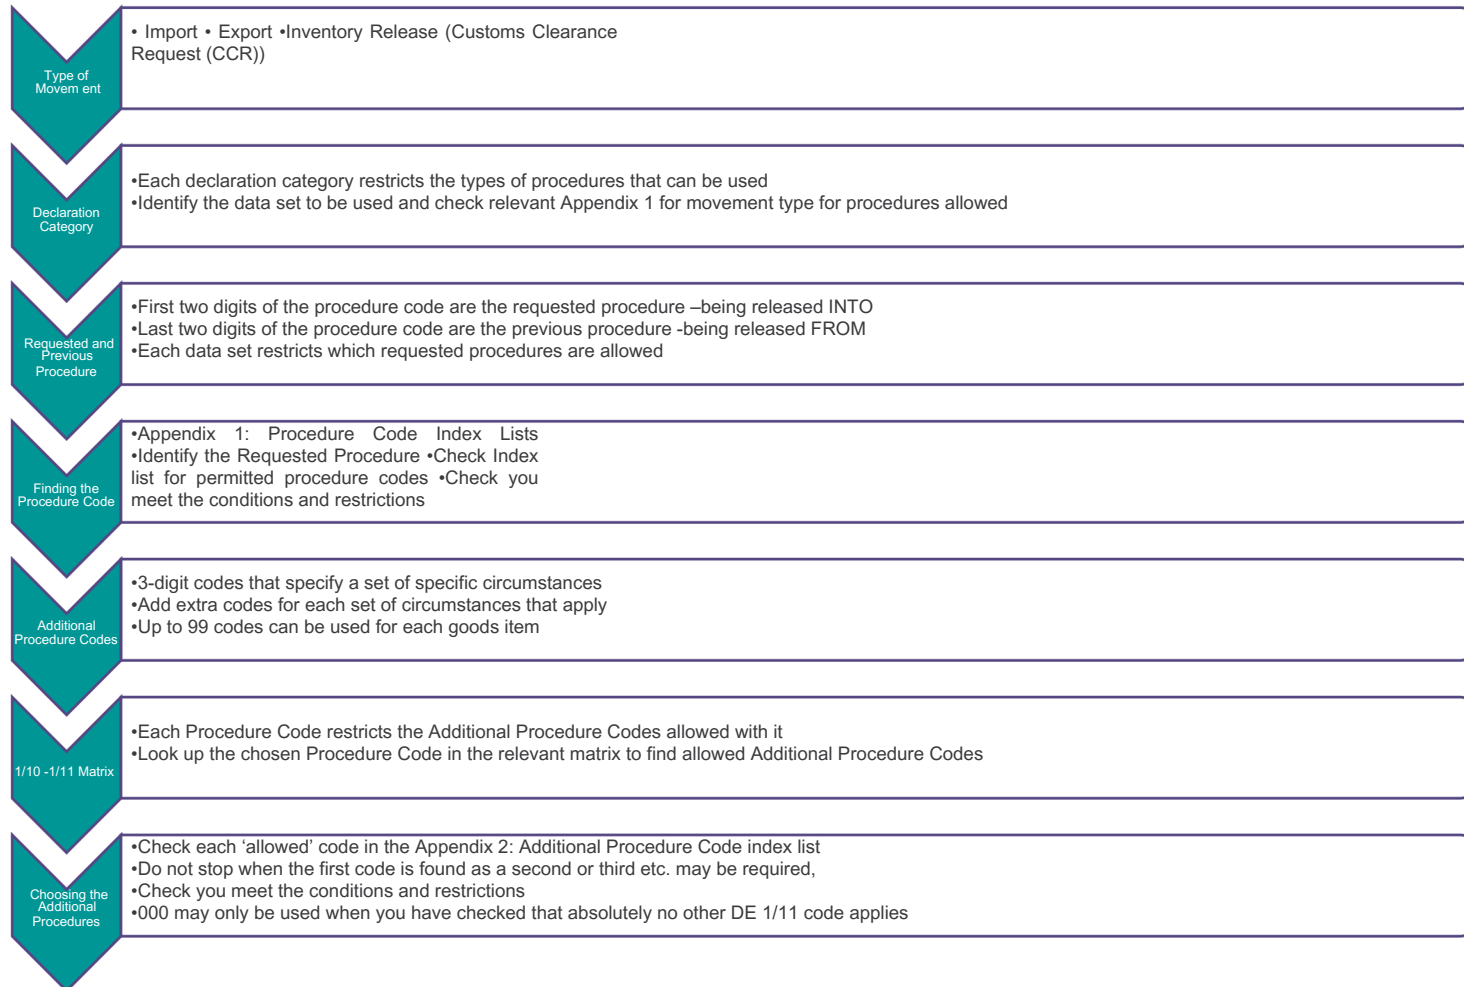

Module 4: Procedure Codes

CHIEF v CDS Procedure Codes:

- Under CHIEF a customs procedure code was 7-digits long
- The CHIEF CPC only ever had one meaning
- Under CDS the procedure codes and additional procedure codes are split into two parts
- Most 4-digit codes in D.E. 1/10 are the same under CDS except
 - End use
 - Entry from a Special Fiscal territory
 - New 01 series introduced
 - Some Procedure Code series codes are not used by UK.
- 3-digit codes in D.E. 1/11 have a single meaning that does not change regardless of which 4-digit D.E. 1/10 codes they are used with

Module 4: Procedure Codes and Additional Procedure Codes

Step-by-Step Guide

Module 4: Procedure Codes

Movement Type	Used for	Standard declarations, Procedures starting with
Import	Simplified declarations Supplementary declarations EIDR NOPs Standard declarations with EXS data, Simplified declarations with EXS data	01, 07, 40, 42, 44, 51, 53, 61, 73
Exports	Supplementary declarations, no EXS data EIDR NOPs Oral declarations or declaration by conduct	10, 11, 21, 22, 23, 31
Inventory Imports	Movement of goods between border locations Transit/ Carnets Standalone EXS declarations Oral declarations or declaration by conduct	0002 –0009
Inventory Imports	Movement of goods between border locations Transit/ Carnets	0012 -0019

Module 4: Procedure Codes

Declaration categories and Procedure Codes:

- Unlike CHIEF, a different declaration category is needed depending on:
 - The type of declaration/ movement you are making (import, export, inventory release)
 - The Procedure you intend to use
- Each declaration category has its own completion rules and data set
 - Supplementary Declarations are completed using the standard H1-H5 and B1, B2 and B4 data sets
- You cannot complete the declaration until you identify which declaration category is appropriate to your type of movement, intended usage of the goods
 - Appendix 21 –Import Declarations
 - Appendix 22 –Export Declarations
 - Appendix 23 –Inventory Releases (Customs Clearance Requests –aka C21)

Module 4: Procedure Codes

Declaration Categories and Procedure Codes: Imports

Declaration Category	Declaration Title	Allowable Procedure Codes (Digits 1 and 2)	Requested Codes (Digits 1 and 2)
H1 H2			01, 07, 40, 42, 44, 61
H3	Declaration for release for free circulation and special procedure: specific use (end use)	71	
	Special procedure: storage (customs warehousing)	53	
	Special procedure: specific use (temporary admission)		
H4	Special procedure: processing (Inward Processing (IP))	51	
H5	Declaration for the introduction of goods in the context of trade with special fiscal territories	40, 42, 61	
I1 C&F	Import Simplified Declaration with regular use (D.E.1/2 Codes C&F)	01, 07, 40, 42, 44, 51, 53, 61, 71	
I1 B&E	Import Simplified Declaration on an occasional basis (D.E.1/2 B&E)	40, 44	
C21i EIDR NOP	Customs Clearance Request for inventory releases –imports released using EIDR	40, 44, 51, 53, 61, 71	

Module 4: Procedure Codes

Declaration Categories and Procedure Codes: Exports

Declaration Category	Declaration Title	Allowable Requested Procedure Codes (Digits 1 and 2)
B1	Export Standard Declaration or Re-export Standard Declaration	10, 11, 23, 31
B2	Special Procedures –Declaration for Outward Processing	21, 22
B4	Declaration for dispatch of goods to a Special Fiscal Territory or Territory with which the EU has formed a Customs Union.	10, 11, 23, 31
C1 C&F	Export or Re-export Simplified Declaration with regular use (D.E.1/2 Codes C&F)	10, 11, 23, 31
C1 B&E	Export or Re-export Simplified Declaration on an occasional basis (D.E.1/2 B&E)	10
C21e EIDR NOP	Customs Clearance Request for inventory releases –exports released using EIDR	10, 23, 31

Module 4: Procedure Codes

Declaration Categories and Procedure Codes: Customs Clearance Requests (CCR)

Declaration Category	Declaration Title	Allowable Requested Procedure Codes (Digits 1 and 2)
C21i	Customs Clearance Request for inventory releases -imports	00 02 –00 09
C21i EIDR NOP	Customs Clearance Request for inventory releases –imports released using EIDR	40, 44, 51, 53, 61, 71
C21e	Customs Clearance Request for inventory releases -exports	00 12 –00 19
C21e EIDR NOP	Customs Clearance Request for inventory releases –exports released using EIDR	10, 23, 31

Module 4: Procedure Codes

Requested and Previous Procedure:

- Each Declaration Category stipulates which series are allowed
- A Procedure Code may not be used with a Declaration Category unless specifically allowed (e.g., H2 only allows 71 series)
- Each Procedure Code is made up of 4-digits
 - The first and second digits indicate the Requested Procedure: the customs procedure to which the goods are being entered.
 - The third and fourth digits indicate the Previous Procedure: the customs procedure from which the goods are being removed. To note: RGR may not always follow this rule
 - 00 as the third and fourth digits indicate that the goods have not been subject to any previous procedure.
- The D.E. 1/10 Requested and Previous Procedure Codes may be found in separate series according to the first two characters of the code (the Requested Procedure)

Module 4: Procedure Codes

Imports:

- 01 Series Procedure Codes: onward dispatch (OSD)
- 07 Series Procedure Codes: excise warehouse
- 40 Series Procedure Codes: release to free circulation
- 42 Series Procedure Codes: onward supply relief (OSR)
- 44 Series Procedure Codes: end use
- 51 Series Procedure Codes: inward processing (IP)
- 53 Series Procedure Codes: temporary admission (TA)
- 61 Series: Re-importation of goods
- 71 Series: Customs Warehousing (CW)

Module 4: Procedure Codes

Exports:

- 10 Series Procedure Codes: Permanent Export
- 11 Series Procedure Codes: Inward Processing with Prior Export Equivalence
- 21 Series Procedure Codes: Temporary Export under Outward Processing
- 22 Series Procedure Codes: Temporary Export under Outward Processing for goods not covered under Requested Procedure Code 21.
- 23 Series Procedure Codes: Returned Goods Relief
- 31 Series Procedure Codes: Re-export of goods following a Special Procedure

Module 4: Procedure Codes

Inventory Releases (CCR):

- 00 00 Series: Inventory Import
- 00 01 Series: Inventory Export

Module 4: Procedure Codes

Identify the 4-digit code:

Once you have identified which Procedure Code Series are permitted for the Declaration Category:

- Procedures Codes are found in Appendix 1 of the CDS Tariff
- Appendix 1 has a contents list for each Movement Type (Imports, Exports, Inventory Releases (CCR))
- These contents lists show every 4-digit code that can be used on CDS
- These are listed by Procedure Code Series
- Review ***all*** codes under the correct Requested Procedure to ensure you identify the correct Procedure Code to be used
The full guidance notes for the code must be read to ensure it is the correct code to use

Module 4: Procedure Codes

Selecting the 1/11 codes required:

- Appendix 2 has a contents list for each Movement Type (Imports, Exports, Inventory Releases (CCR))
- These contents lists show every 3-digit code that can be used on CDS
- These are listed by Additional Procedure Code Series for each movement type, e.g., 1 series for import, export, inventory import and inventory export releases
- The contents list give a short title for each code to help you identify if it may apply to your circumstances
- Read the contents list for every code the matrix says may be used
- Do not stop at the first code you find that seems to fit as multiple codes may be required
- Up to 99 Additional Procedure Codes can be used for each goods item
- Once possibilities are identified from the contents list the full guidance notes for the code must be read to ensure it is the correct code to use

Module 4: Procedure Codes

1/10 to 1/11 Correlation

- A matrix is provided for each Declaration/ Movement Type
- The matrix show which 1/10 codes can be used with which 1/11 codes and vice versa

versa

1/11 A04	
10 07	
10 40	
10 42	
10 44	
11 00Y	

1/1110 0710 4010 4210 4411 00					
A04					Y

- This information is also shown in each 1/10's and 1/11's guidance notes
- If a 1/11 code is not shown against a 1/10 code, it cannot be used and vice versa
- The CFSP Exclusions list also needs to be checked to ensure any restrictions on the use of SDP or EIDR are identified
- Even if a 1/10 allows EIDR, if the required 1/11 prohibits EIDR it cannot be used

Module 4: Procedure Codes

Choosing the Additional Procedure Codes

- Check each 'allowed' code in the Additional Procedure Code index list
- Do not stop when the first code is found as a second or third may be required,
Check you meet the conditions and restrictions
- 000 may only be used when you have checked that absolutely no other 1/11 code applies
-

Module 4: Procedure Codes

Union 1/11 Codes

- The conditions and restrictions for use must be read to ensure you are eligible to use the code
- Union Codes take precedence over National Codes
- National Codes must only be used where no Union Codes apply
- Multiple Union Codes may be required to cover the full circumstances of the goods:
 - E.g., most C series codes will require a second code or only customs duty relief will be granted
- If the goods are coming from or going to a special territory, either F15, 15F, F75 or 75F will always be required regardless of any other 1/11 codes being used
- A mix of Union and National Codes may be required. Union codes always being declared first

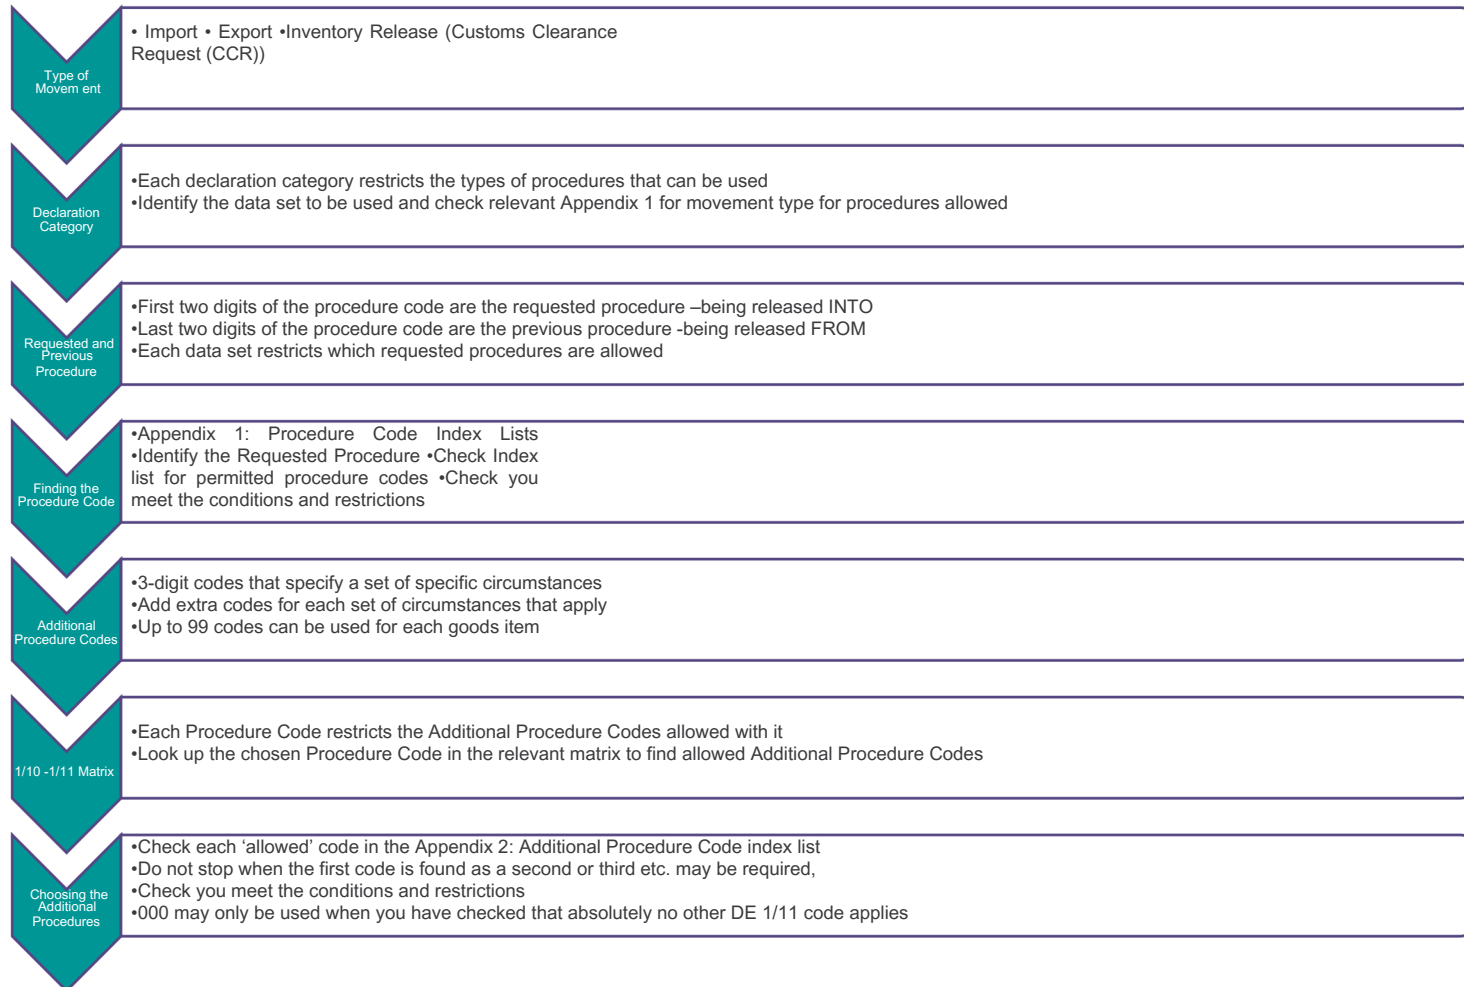

Module 4: Procedure Codes

National 1/11 Codes:

- The conditions and restrictions for use must be read to ensure you are eligible to use the code
- National Codes must only be used where no Union Codes apply
- Multiple National Codes may be required to cover the full circumstances of the goods:
 - E.g., wherever controlled drugs or goods are declared to a special procedure using SDP, either 2CD or 2CG is required regardless of any other codes which may apply
- 000 may only be used after it has been determined that absolutely no other code applies
